

# Vision Zero

## Participating Agencies

- |      |      |         |
|------|------|---------|
| DDOT | FEMS | DMPED   |
| MPD  | DFHV | Gov Ops |
| DPW  | OP   | DMPSJ   |
| DMV  | DOH  | DMHHS   |
| OSSE |      | DME     |

# Agenda

1. Overview of Vision Zero
2. Crash and Fatality Data
3. Case Studies: High Crash Intersections & Areas
4. District Responses:
  - Create Safe Streets (SS)
  - Protect Vulnerable Users (VU)
  - Prevent Dangerous Driving (DD)
  - Be Transparent and Responsive (TR)
5. Big Ideas

# Overview

Launched in 2015, Vision Zero DC is an all-hands-on-deck approach to eliminate traffic fatalities and serious injuries in Washington DC by 2024 through the use of data, education, enforcement, and engineering.

Vision Zero work is focused on four themes with sub-strategies:

- Create Safe Streets (SS)
- Protect Vulnerable Users (VU)
- Prevent Dangerous Driving (DD)
- Be Transparent and Responsive (TR)

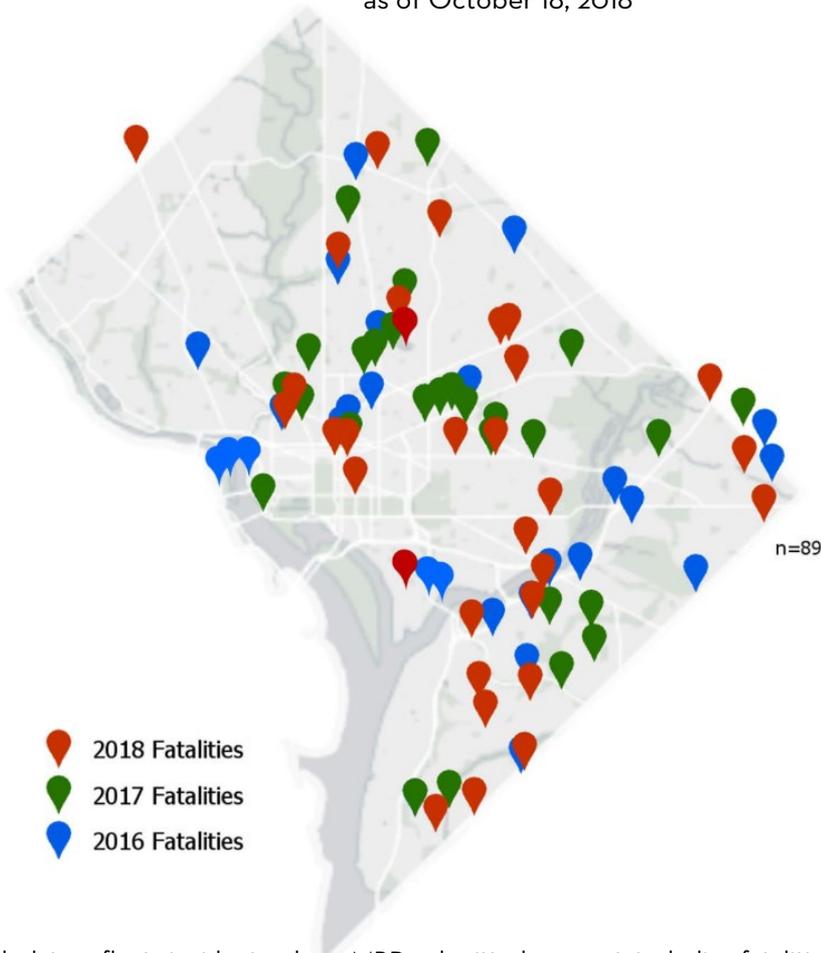

To address these themes, four interagency working groups were created, focused on:

- Data
- Education
- Enforcement
- Engineering

# Crashes are most prevalent in the downtown core, but fatalities are spread across the District

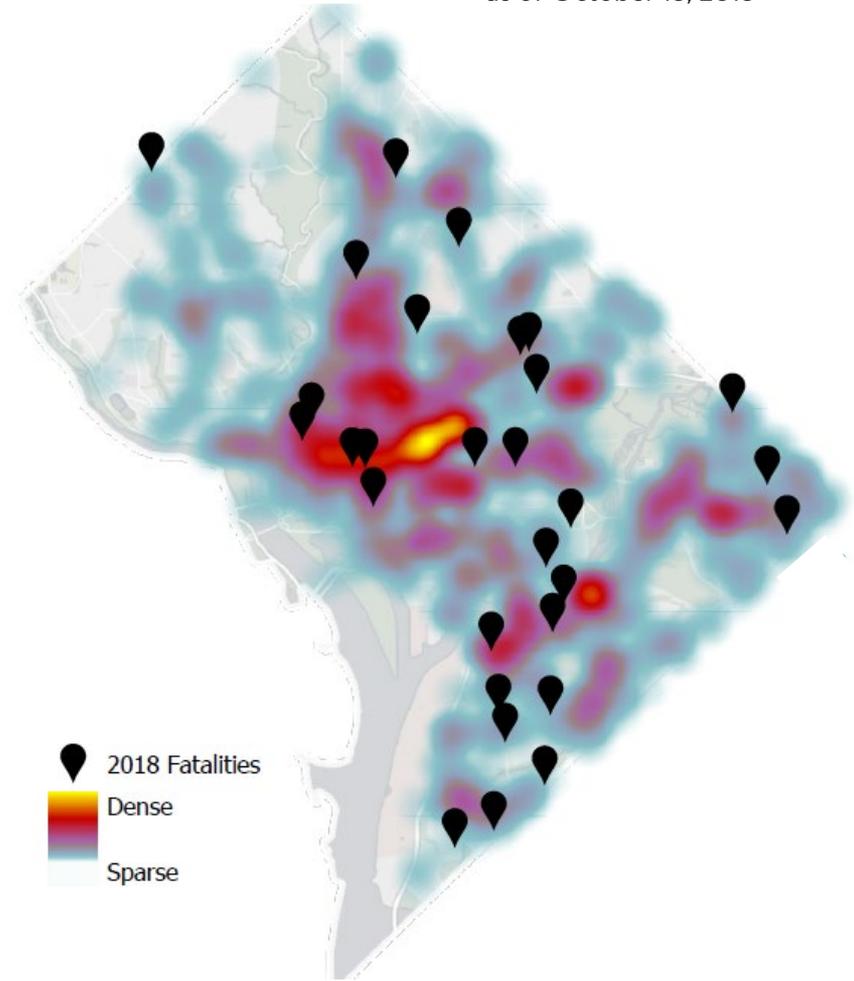

## CY2016-2018 Traffic Fatalities

as of October 18, 2018

## CY2018 Crash Data and Traffic Fatalities

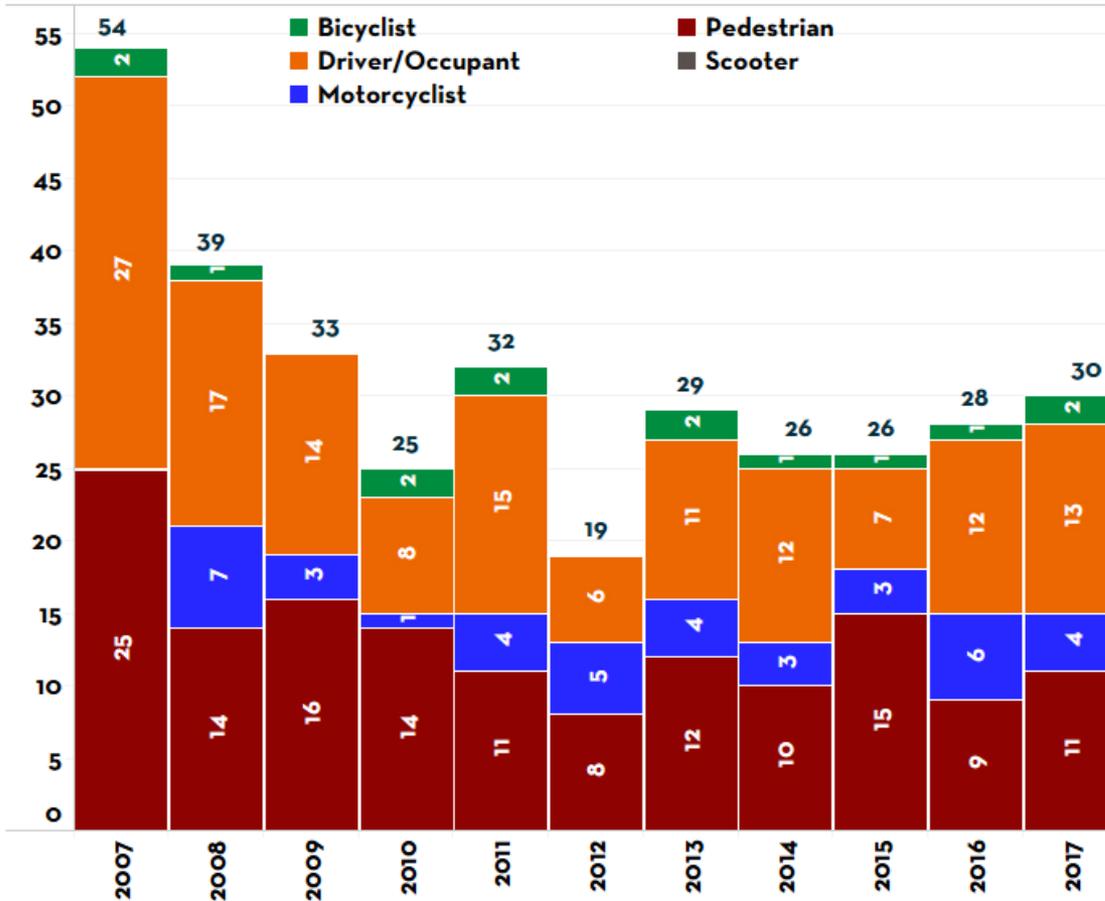

as of October 18, 2018

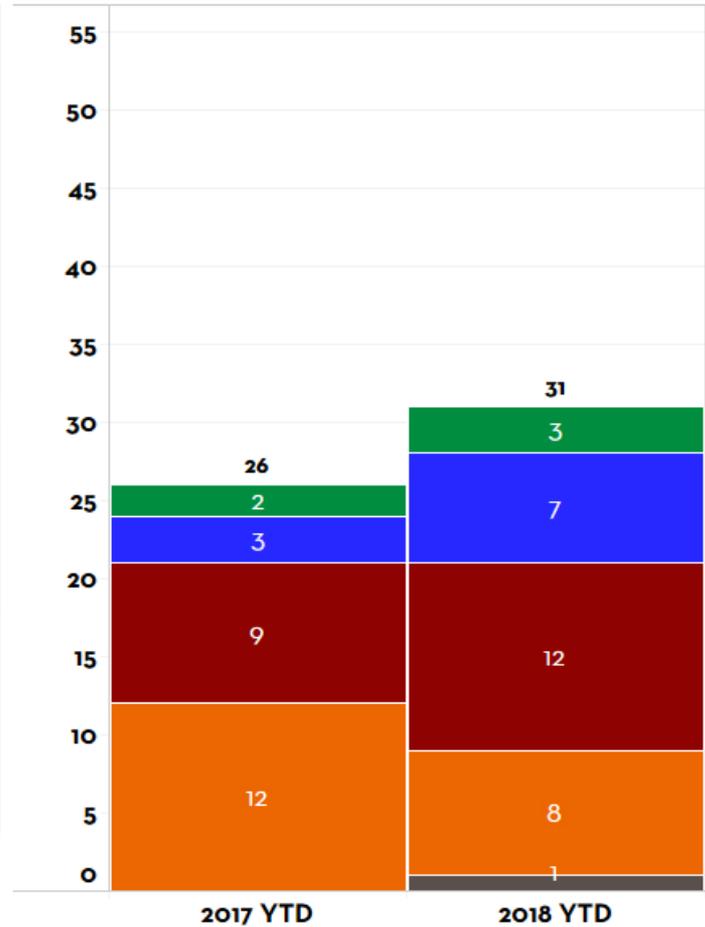

Crash data reflects incidents where MPD submitted a report, including fatalities or non-fatalities, government owned vehicles, vehicles involved in a crime, a police report is required, or the incident involved a diplomat.

# Traffic fatalities have decreased over a 10-year period, but are slightly higher in recent years

**CY2007-2017  
Traffic Fatalities**

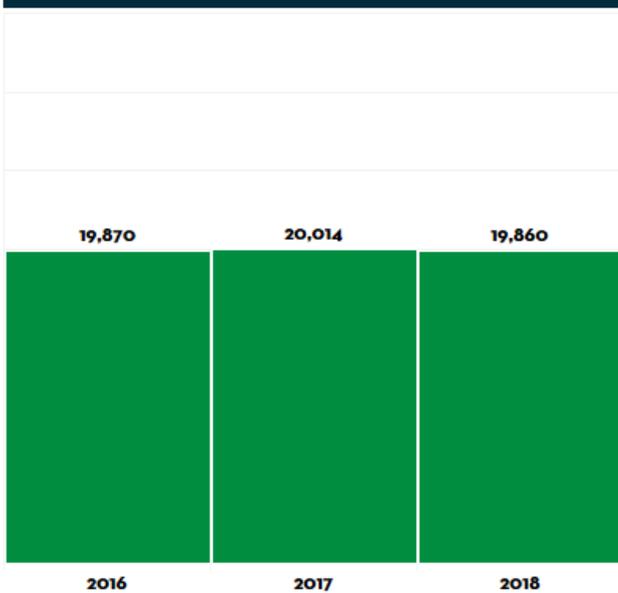

**CYTD 2017 & 2018  
Traffic Fatalities**

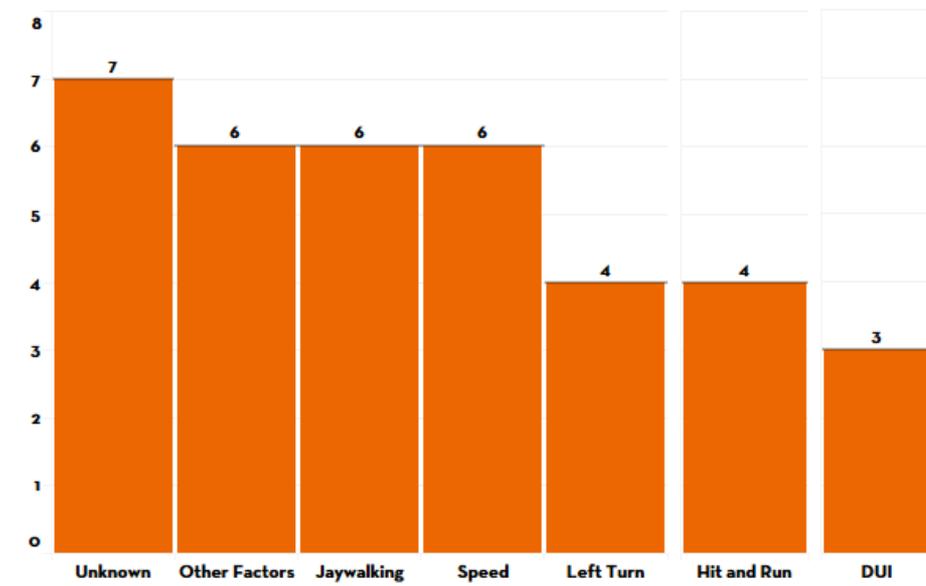

\*Data from MPD, October 19, 2018

# While fatalities have increased, crashes remain at similar levels to previous years

## 2016-2018: Jan-Oct Crashes

## Incident Factors: 2018 Fatalities

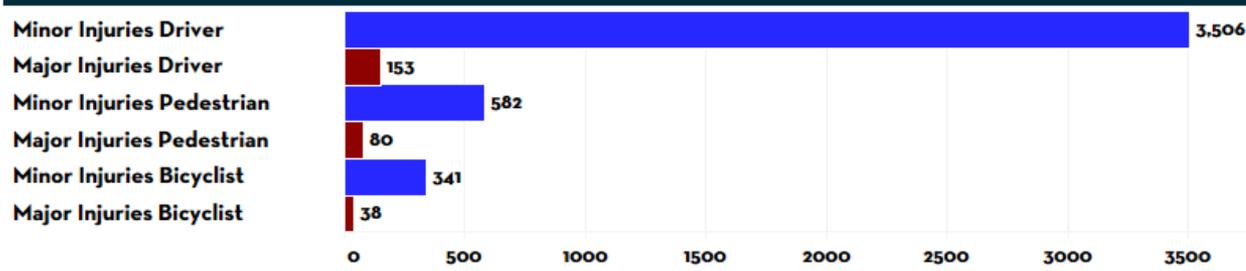

Note: there may be more than one factor involved in an incident.

Other factors include medical emergency; right turn; running a red light; biker riding dangerously; among others

Crash factors tracked by DDOT include speed and drivers/pedestrians/bikers under the influence.

## Injuries from Crashes, CY2018

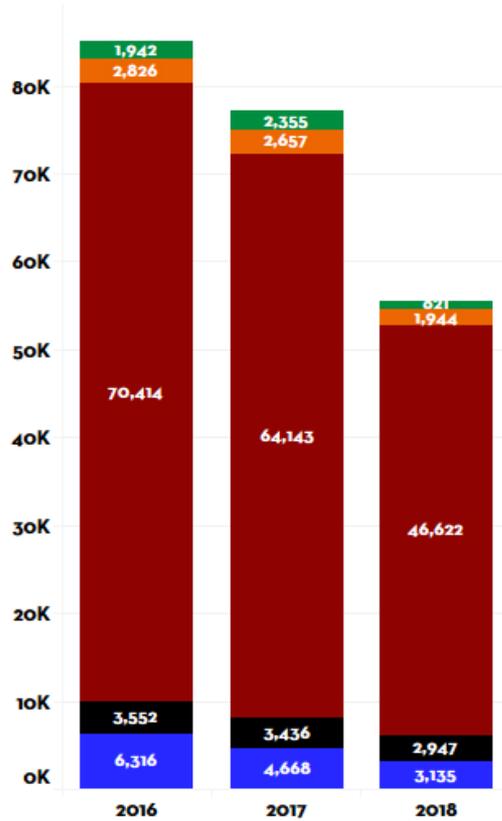

Major injury includes: Possible Internal Injury, Unconsciousness, Apparent Broken Bones, Loss Of Teeth, Concussion, Severe Laceration

Minor injury includes: Abrasions, Minor Cuts, Discomfort, Bleeding, Swelling, Pain, Apparent Minor Injury, Bruises

Data from MPD Crash Data. Injuries analyzed by DDOT. As of October 18, 2018

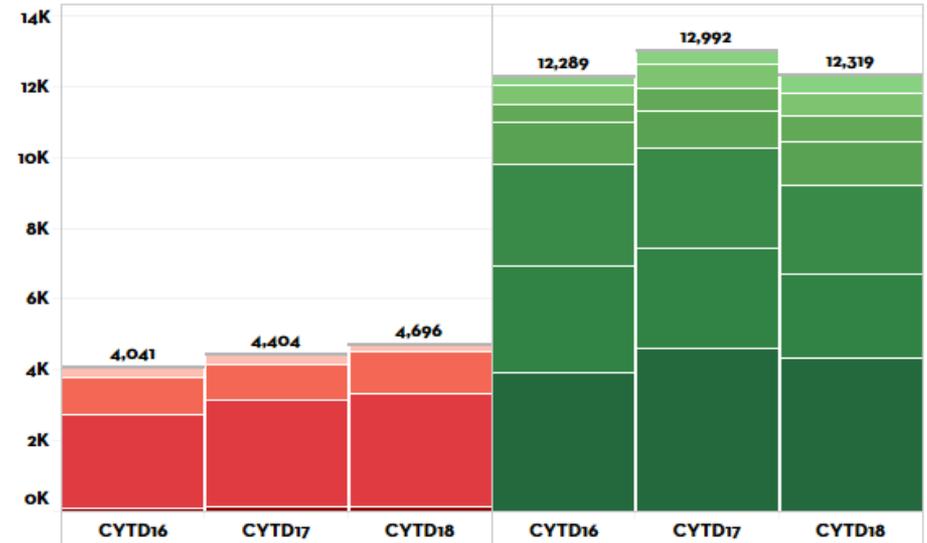

# District's ticketing levels are lower than previous years

DPW Ticketing ,  
Jan-Sept, 2016-2018

- Stop/Stand Bike Lane
- Obstructing Crosswalk
- No Parking/Standing Rush Hour
- Stopping Prohibited
- Double Parking

MPD Driver Violations (Arrests - Red; Tickets - Blue)  
CYTD2016, 2017, 2018

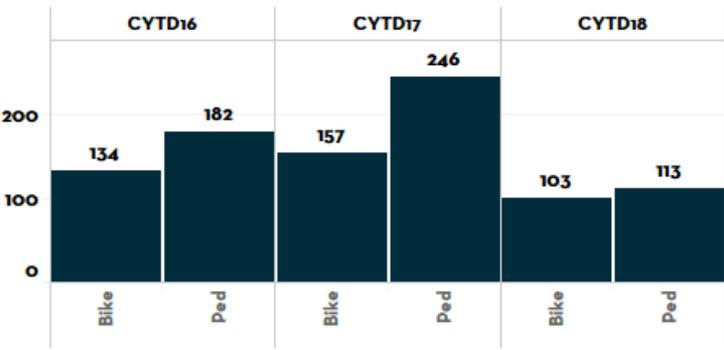

- Hit & Run
- Impaired Driving
- No Permit/Suspension
- Reckless Driving
- Illegal U Turn
- Failure to yield to Ped / Bike
- Stop / stand bike lane
- Speeding
- Seat belt violation
- Distracted driving
- Failure to stop at sign

This is a selection of the 60K NOIs MPD issues each year for moving violations (~48K in CYTD2018).

Pedestrian violations include: pedestrian walking so as to create a hazard, pedestrian walking on red, pedestrian leaving curb in unsafe manner, pedestrian fail to yield to emergency vehicle, and pedestrian obstructing traffic.

Bike/PMD violations include: ride two on a bicycle, disobey traffic device or officer while on a bike, fail to yield right of way, riding so as to create a hazard, riding so as to obstruct traffic, improper equipment, riding on sidewalk in central business district, and riding abreast.

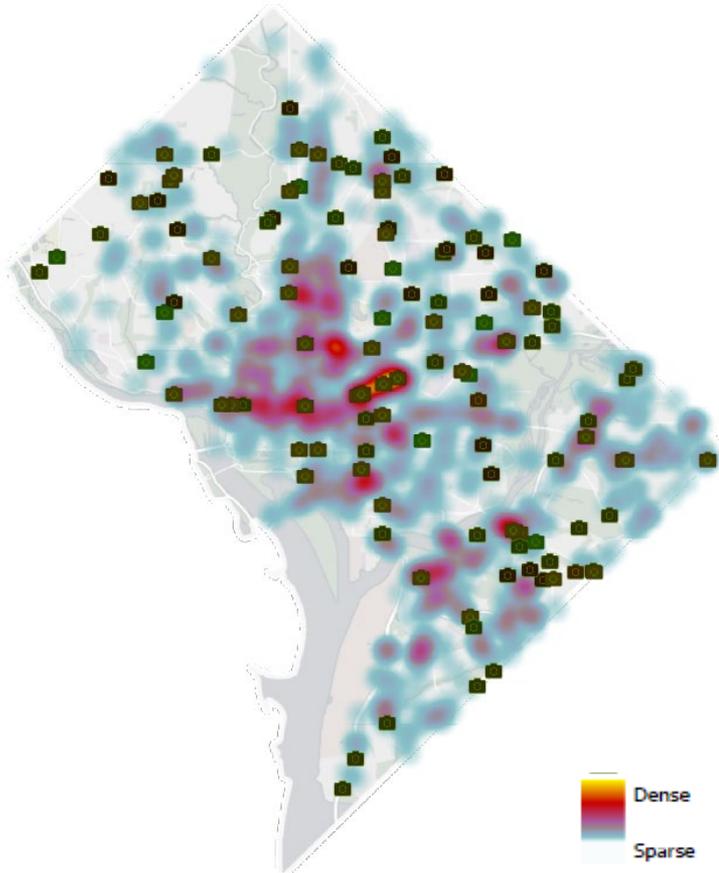

MPD Tickets: Bike/PMD and Pedestrian

Data as of 10/18/18

# Enforcement: Camera Locations and Volume of ATE Tickets

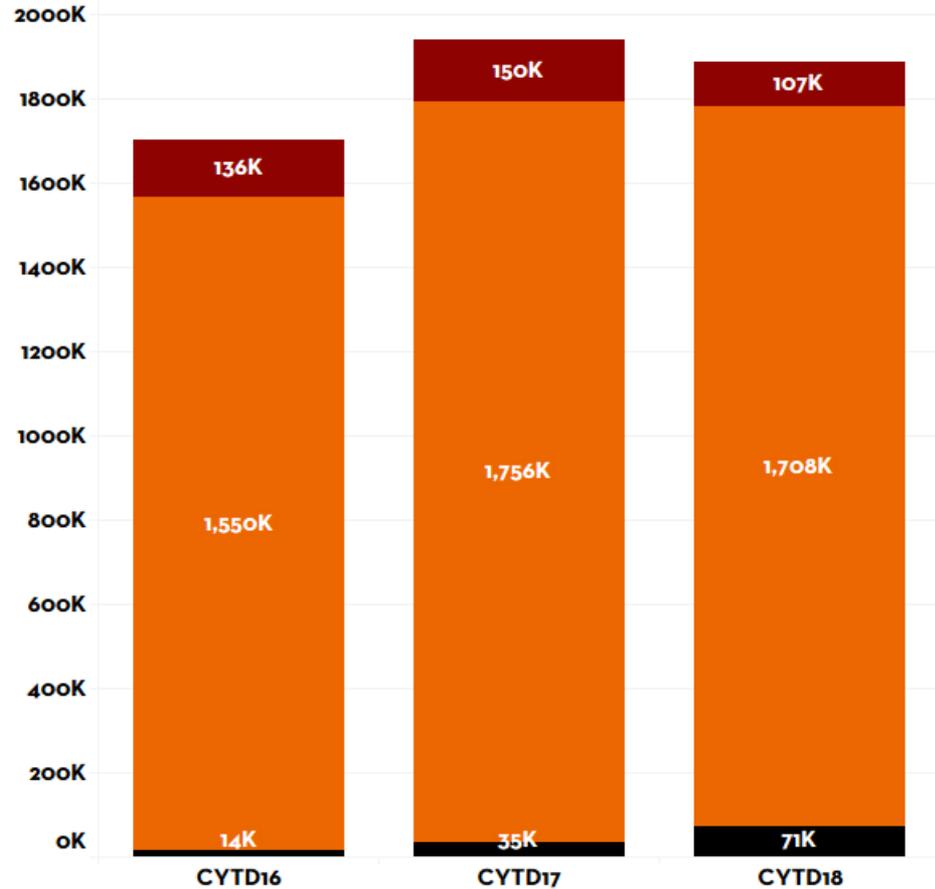

## Heat Map of 2018 Vehicle Crashes and Camera Enforcement Locations

Cameras represented include speed cameras, red light cameras, and stop sign cameras

MPD Tickets: Automated Traffic Enforcement  
CYTD2016, 2017, 2018

- Redlight
- Speed
- Stop Sign

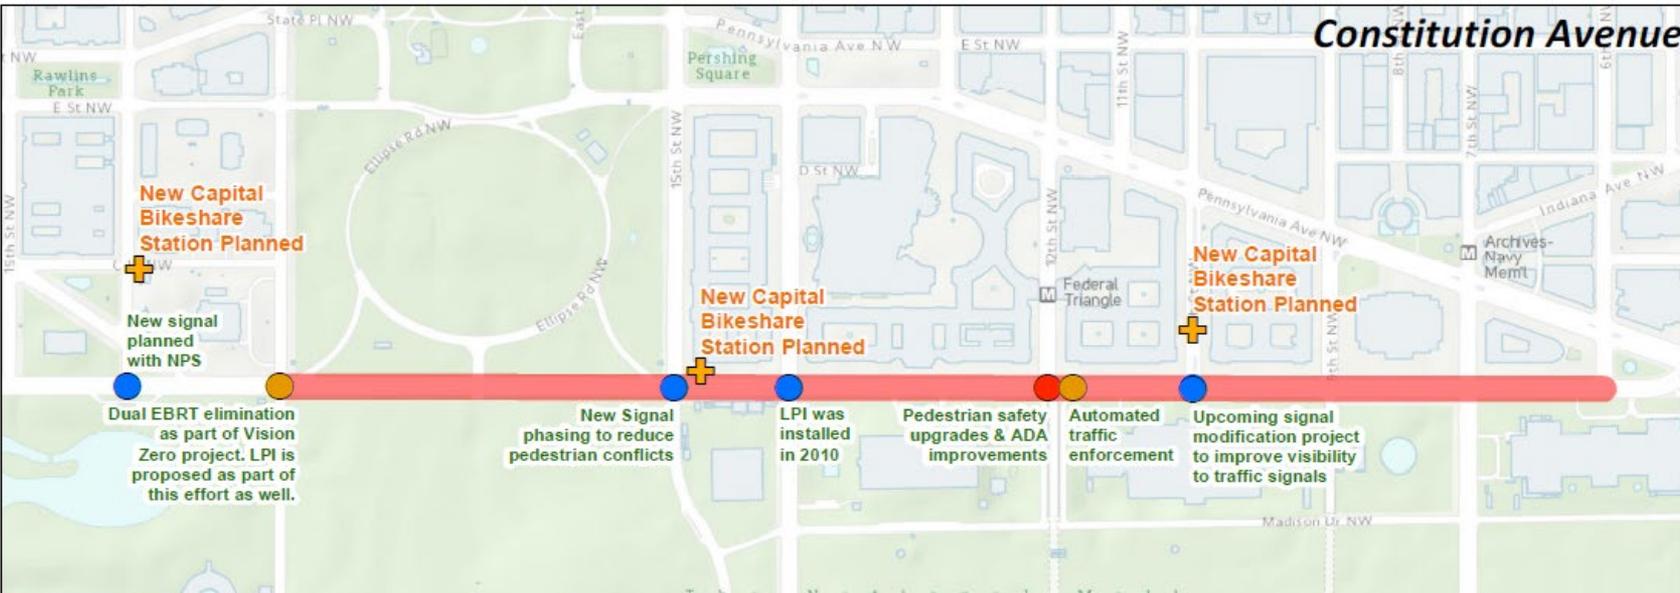

Data as of 10/18/2018

Tickets for oversized vehicles not included (~approx 1,000)

# Case Study: 4 High-Crash Corridors

- ◆ Constitution Avenue
- ◆ Florida Avenue
- ◆ Alabama Avenue SE
- ◆ Benning Road NE

Crashes around Constitution Ave, CY2016-2018  
 Red dots indicate car accident; Blue dots indicate pedestrian or biker injury

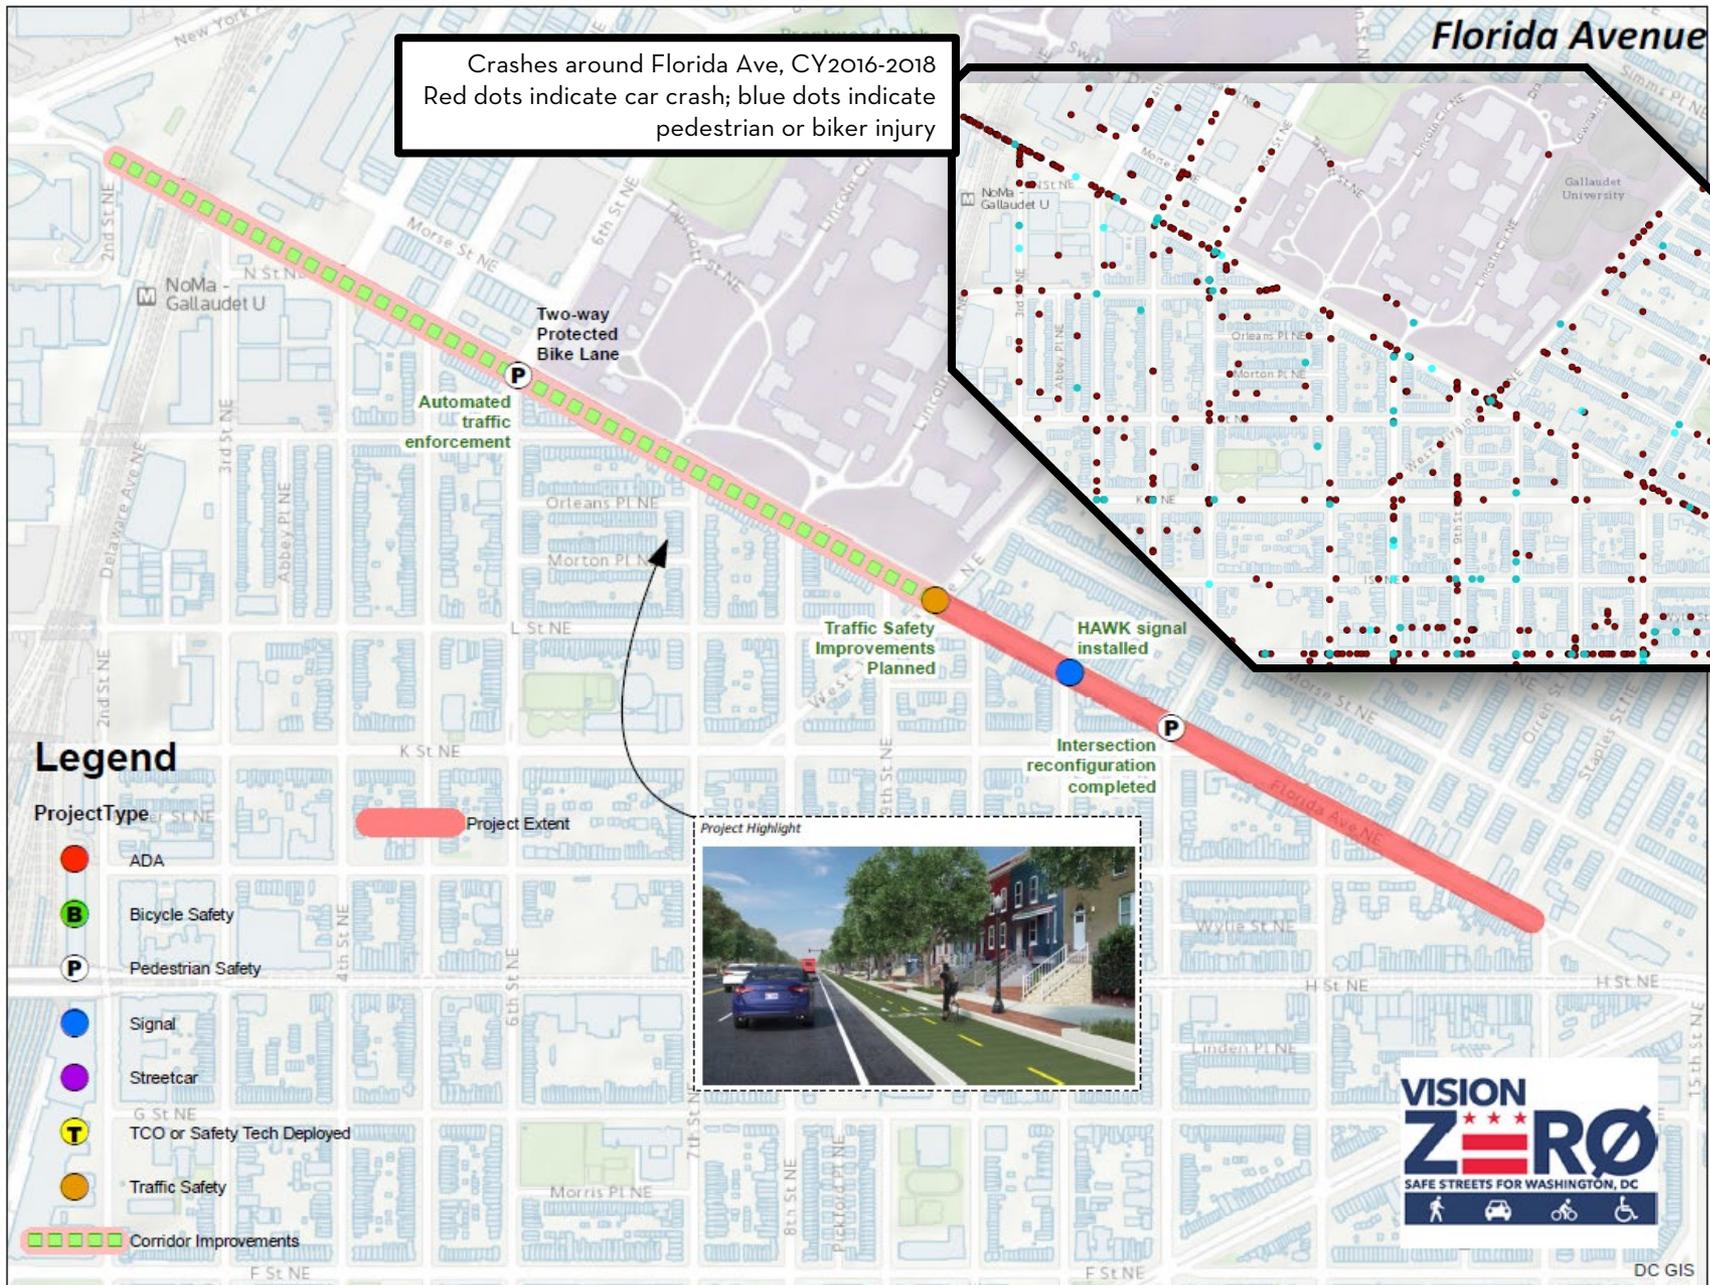

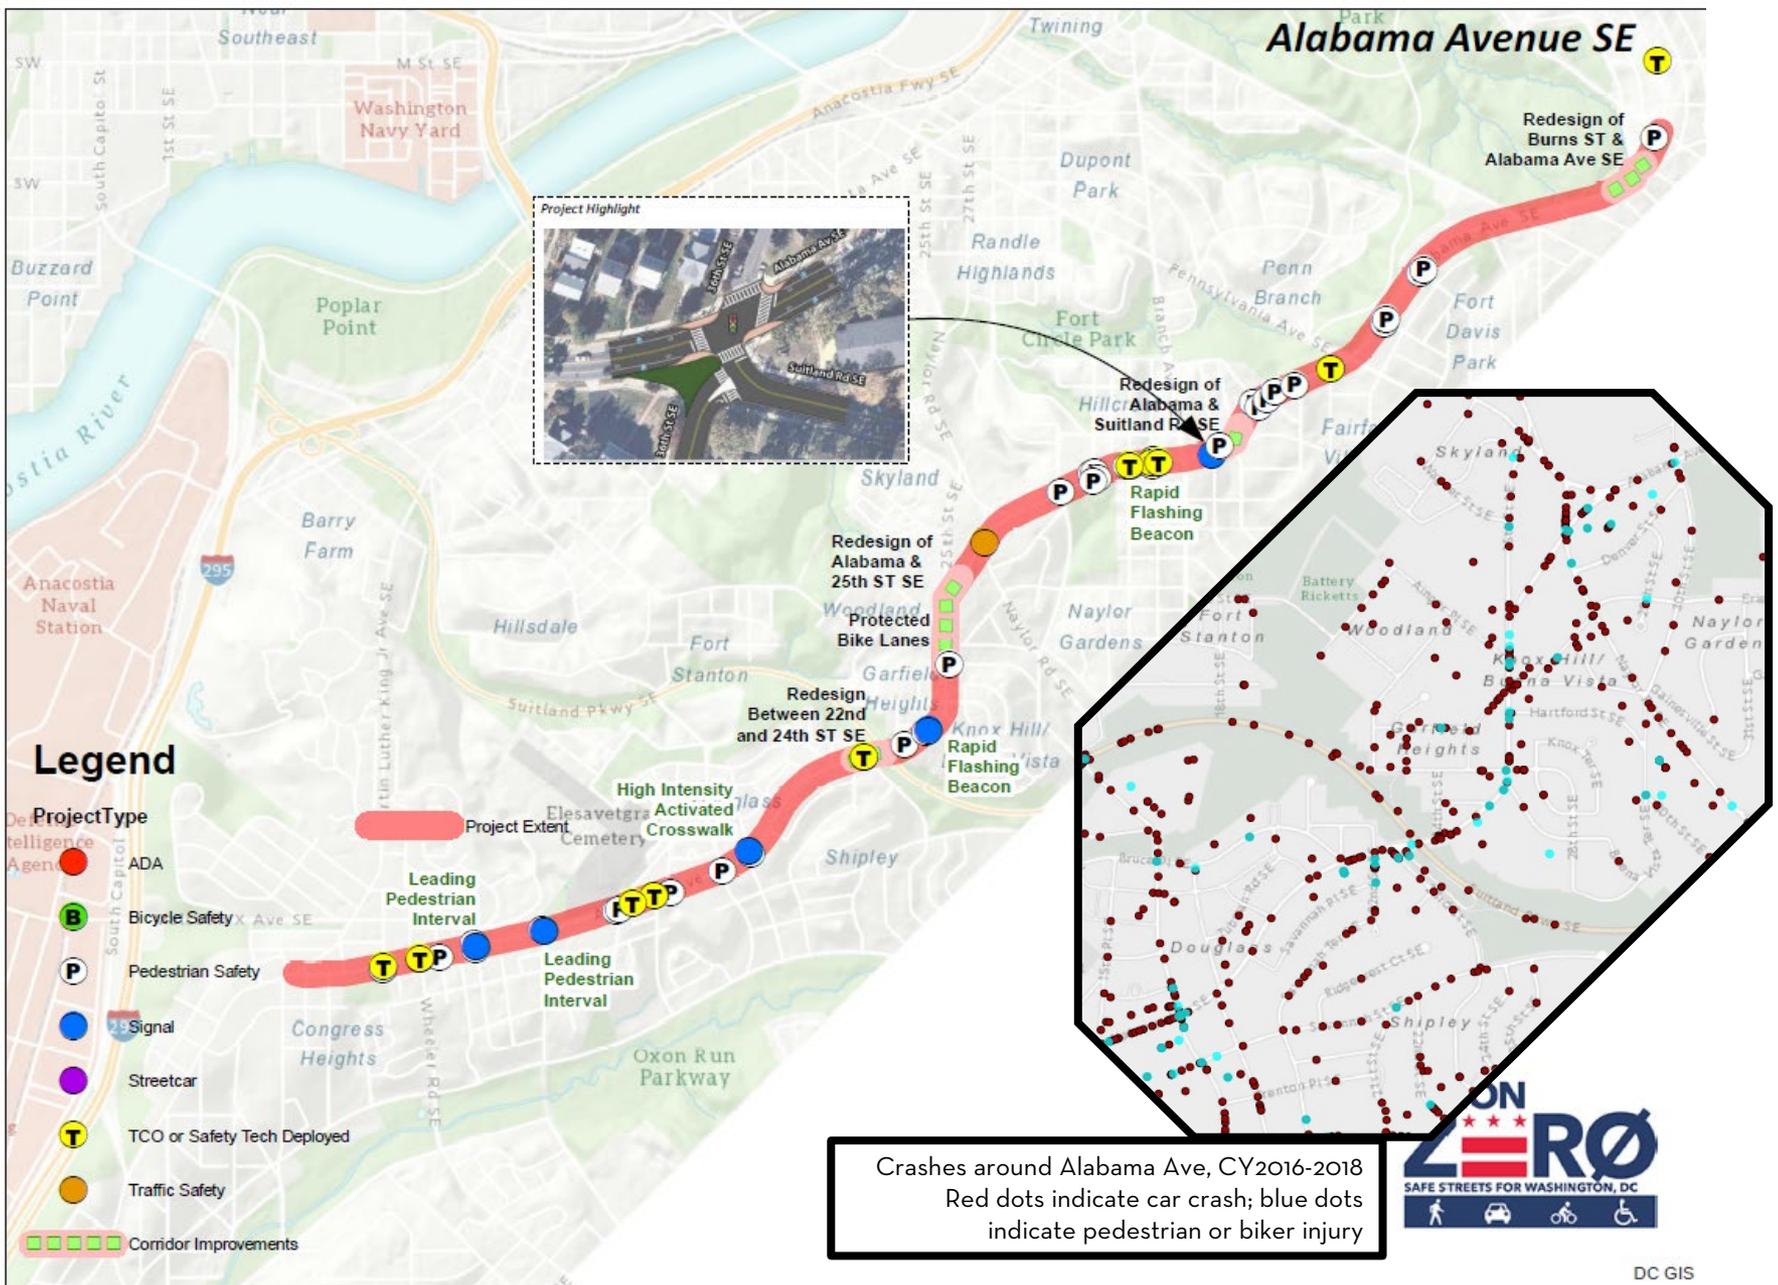

### Legend

# Benning Road NE

# Immediate Impact Strategies

1. MPD will be conducting a Citywide Traffic Safety Blitz from October 25 through October 28. MPD will conduct enhanced enforcement focusing on excessive speed, impaired driving, blocking the box and bicycle lanes, and commercial vehicle safety
2. DDOT uses flexi-posts for rapid deployment, to do short term projects such as blocking off parking spots, protecting bike lanes, installing curb extensions
3. DDOT adjusts timing of traffic lights in order to improve traffic flow and ensure cars have an opportunity to exit the intersection
4. DDOT adds signage to clarify instructions and conditions
5. In warmer weather months, DDOT can rapidly deploy markings to create and reinforce traffic lanes, bike lanes, turning lanes, etc.
6. DFHV collects and adjudicates complaints against vehicles for hire through a new system for bikers to report incidents
7. DPW deploys parking officers on bikes to provide a bikers view of the issues facing cyclists
8. Review and improve interagency data cooperation and coordination to improve data quality

# Long Term Vision Zero Strategies

Theme	Strategies	Complete (& Ongoing)	In Progress
Create Safe Streets (SS) Includes: <ul style="list-style-type: none"> <li>Codify a complete streets law that prioritizes the most vulnerable travelers' safety. Streets must be engineered to self-enforce a safe speed. Rectify street design and future growth projections. (DDOT)</li> <li>Evaluate taxi staging areas to avoid conflicts with other travelers and relocate or remove when necessary. Investigate potential for all vehicle-for-hire staging areas. (DFHV)</li> </ul>	10	5	5
Protect Vulnerable Users (VU) Includes: <ul style="list-style-type: none"> <li>Install or upgrade 20 miles of on-street bicycle facilities. (DDOT)</li> <li>Enhanced enforcement that focuses on improper U-turns through bicycle facilities, parking in/blocking bike lanes, improperly entering mixing zones, dooring, and failure to observe three foot passing law. (MPD)</li> </ul>	21	16	5
Prevent Dangerous Driving (DD) Includes: <ul style="list-style-type: none"> <li>Launch enhanced DPW Boot-Tow-Release program. Target habitual offenders with two or more unpaid citations related to safety (DPW)</li> <li>Strategically deploy photo enforcement (MPD)</li> </ul>	22	14	8
Be Transparent and Responsive (TR) Includes: <ul style="list-style-type: none"> <li>Publish geospatial analysis of safety-related citations issued and adjudicated (DDOT)</li> </ul>	14	9	5

Complete list of strategies, agencies involved and status updates included in appendix.

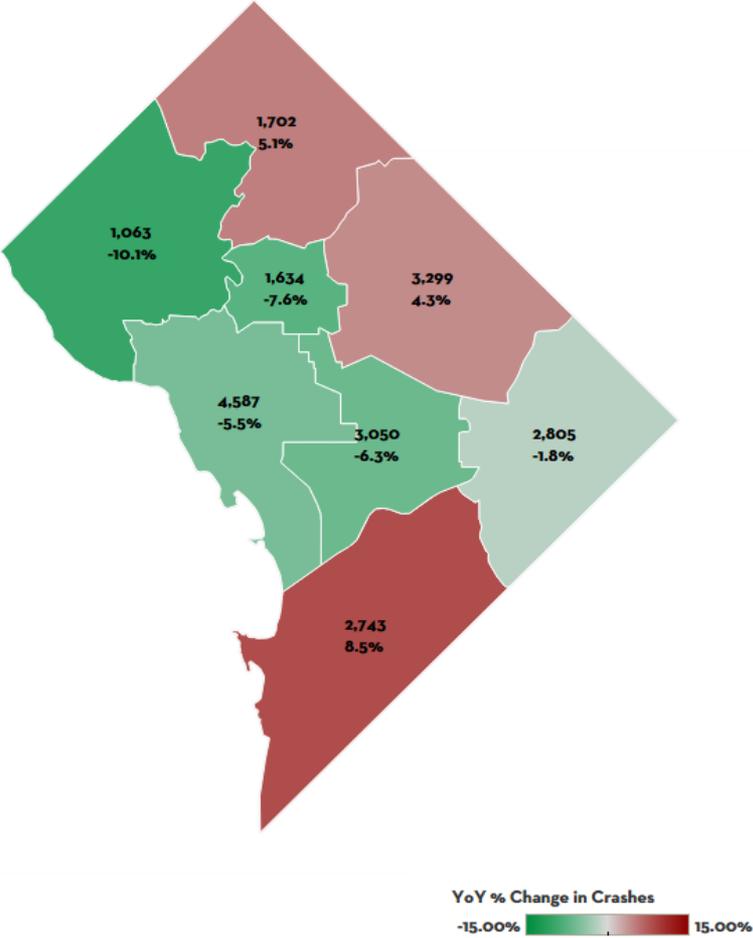

# New Big Ideas

Title	Details															
<b>20 MPH “slow zones”</b>	Reduce signed speed limit to 20 on neighborhood streets															
<b>Accelerated Bike Lane Network Expansion</b>	<p>Advance projects already in design to construction within 3 years to more than double the protected lane network.</p> <p>Corridors already in planning/design:</p> <table border="0" data-bbox="490 297 1721 486"> <tr> <td data-bbox="490 297 923 321">Eastern Downtown (9<sup>th</sup> Street NW)</td> <td data-bbox="993 297 1296 321">Crosstown (Irving Street)</td> <td data-bbox="1489 297 1638 321">C Street NE</td> </tr> <tr> <td data-bbox="490 337 595 361">20/21/22</td> <td data-bbox="993 337 1348 361">K Street NW (NoMA to MVT)</td> <td data-bbox="1489 337 1663 361">Penn Ave NW</td> </tr> <tr> <td data-bbox="490 376 639 401">Virginia Ave</td> <td data-bbox="993 376 1174 401">Park Place NW</td> <td data-bbox="1489 376 1721 401">Warder Street NW</td> </tr> <tr> <td data-bbox="490 416 649 441">Penn Ave SE</td> <td data-bbox="993 416 1238 441">Brentwood Parkway</td> <td data-bbox="1489 416 1702 441">Louisiana Avenue</td> </tr> <tr> <td data-bbox="490 456 819 481">1st Street SE/Potomac Ave</td> <td></td> <td></td> </tr> </table>	Eastern Downtown (9 <sup>th</sup> Street NW)	Crosstown (Irving Street)	C Street NE	20/21/22	K Street NW (NoMA to MVT)	Penn Ave NW	Virginia Ave	Park Place NW	Warder Street NW	Penn Ave SE	Brentwood Parkway	Louisiana Avenue	1st Street SE/Potomac Ave		
Eastern Downtown (9 <sup>th</sup> Street NW)	Crosstown (Irving Street)	C Street NE														
20/21/22	K Street NW (NoMA to MVT)	Penn Ave NW														
Virginia Ave	Park Place NW	Warder Street NW														
Penn Ave SE	Brentwood Parkway	Louisiana Avenue														
1st Street SE/Potomac Ave																
<b>ATE Governance</b>	Announce move of ATE Program to DDOT as of January 1; Cut in half the time it takes to review, process, and mail ATE tickets; Completion of ATE deployment SOP and accelerate deployment toward highest-risk corridors.															
<b>Lower ATE Enforcement Threshold</b>	Establish lower threshold for ATE speed enforcement and lower fine threshold.															
<b>Systematically address left turns at high conflict locations</b>	Deploy additional treatments such as left turn “hardening” to slow turns and left turn prohibitions at 100 priority locations.															
<b>Implement All Way Stops at all “local/local” intersections</b>	Modify traffic controls to provide all ways tops at all “local/local” intersections.															
<b>Ban “Right on Red” at priority locations</b>	Develop criteria to identify 100 priority locations in the City (within CBD, school zone and along cycle tracks) where No Right Turn on Red would be implemented. (More targeted than the above NOTR strategies.)															
<b>“Open Streets” Events</b>	Partner with non-profit third party entity on “Open Streets” events as a recurring effort, potentially designating one street or identifying neighborhood streets in partnership with local communities.															
<b>Establish Pedestrian-Only Zones</b>	Use signals, signage, and barriers to ban motor vehicles from certain streets.															
<b>Authorize DPW to mail bike lane citations instead of placing on car windshield</b>	Amend DC Code to allow bike lane citations to be mailed, instead of being placed on the vehicle’s windshield, as is current practice. DPW cannot process ticket if car drives off before ticket is issued. If enacted, DPW can mail citations to registered owner of car.															
<b>Eliminate Connecticut Ave Reversible Lane</b>	Eliminate Connecticut Avenue Reversible Lane															
<b>Accelerated Road Diets</b>	Accelerate implementation of corridor reconfigurations by removing parking to prioritize curb use for other uses.															
<b>Expand the Safe Passages program</b>	Currently the Safe Passages program covers 6 zones in the District. Conduct a study on other high need zones, and expand the program accordingly.															
<b>Driver retesting and education</b>	Retest drivers for licensing and provide increased education through DMV activities.
